

## LOSS CONTROL SERVICES & RESOURCES

American Specialty's Risk Management philosophy focuses heavily on the implementation of day-to-day proactive measures to help clients prevent problems BEFORE they occur. Our Risk Management team possesses hands-on experience working within the Sports, Leisure and Entertainment industries providing them with an acute understanding of the realities clients face within their daily operations.

Our portfolio of risk management tools and services is tailored to the specific industry our clients serve. These tools and services are designed to assist our clients to better manage risk by, 1) identifying loss exposures and loss trends, 2) increasing defensibility, and 3) preparing for disruptive events. Examples of some of our services include:

➤ **ON-SITE INSPECTIONS**

Provided on a fee-for-service basis, American Specialty performs on-site inspections, evaluating both physical facility and operational aspects of a client's business. Using proprietary specialty checklists and evaluation criteria, our loss control personnel works with the client to identify areas of concern and offer recommendations based on industry best-practices.

➤ **INDUSTRY-FOCUSED SAFETY CHECKLISTS**

American Specialty has developed dozens of industry-focused checklists for use by our client's operations personnel to help mitigate risk. These are available on our website under [Risk Management](#).

➤ **TOOLS TO PREPARE AND PLAN FOR POTENTIALLY DISRUPTIVE EVENTS**

American Specialty has authored a library of emergency response checklists and template plans for clients in the Sports, Leisure, and Entertainment niche. For large, sophisticated clients, we have additionally developed Business Continuity/Crisis Response checklists and template plans and assisted with on-site tabletop disaster planning exercises. Please contact [Rich Powers](#) for more information.

➤ **RISK ALERTS & SAFETY BULLETINS**

Safety bulletins and risk alerts identifying key risk exposures and safety issues pertinent to the client's business have been developed and are posted on our [website](#) for client access.

➤ TRAINING PROGRAMS

Most training programs have been developed to assist our client's risk management personnel to help with their internal staff and safety training. Areas of focus include incident response, incident investigation, and slip, trip, and fall prevention programs.
